REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Watkins et al, best reference of record, teaches substantially what is being claimed in independent claims 1 and 6, except for the spectrally selective influencing means that is arranged in the beam path of the detection light. Such a means is used in cooperation with a polarizing beam splitter in such a manner that the polarizing beam splitter splits the illumination light reflected or scattered from the sample out of the detection light. This characteristic is not seen taught or suggested in the prior art of record. In view of this difference, it is concluded that the present invention distinguishes over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
